

Websense V6 Administration Course (1 Day)

Following the release of Websense Version 6, E92 Training is pleased to announce the new Websense Administration Training programme.

This course has been developed by E92 in conjunction with Websense and is designed to support Websense customers and ensure that they obtain the skills and knowledge necessary to install, configure and support their Websense solution.

This one-day overview course covers the installation and configuration of the Websense Security Suite (including Websense Enterprise) and Websense Reporting Tools.

Objectives:

Delegates attending this course will be able to:

- Demonstrate an understanding of the Websense product range
- Understand the Websense Web Security Suite architecture
- Install Websense Web Security Suite
- Define, implement and test policies
- Configure directory service authentication
- Install and use Websense Reporting Tools

Topics covered:

Delegates attending this course will gain hands-on experience in:

- Product overview
- Architectural Tour
- Installation of Websense and database download
- Install Websense Web Security Suite
- Websense Server Configuration
- Websense Manager – component parts
- Filtering Techniques
- Authentication
- Websense Reporting Tools
